Locking Impact Extensions

New 1/2" drive locking impact extensions were designed to prevent accidental disengagement of sockets with the ability to quickly and easily replace sockets on demand.

- One-piece design avoids the use of set screws, binding pins, or retaining rings.
- Available individually in 3", 5", and 10" lengths or as a set of three.

Features & Benefits

- Solid one-piece design prevents the locking components from becoming loose or disengaged.
- Patented locking feature locks sockets to the extension with exceptional force preventing accidental disengagement.
- Knurled shank provides a non-slip grip when hand-turning the extension.

Part No.	Description	Dimensions	UIC Code	Price
